JULY 4, 2005, EDMOND, OKLAHOMA. WeatherBank, Inc., a leader in the weather services industry, announced today that it has implemented its proprietary forecasting processes to generate daily forecasting graphics for its web sites.

The forecasting routines generate the most accurate forecasts possible in projecting daily weather, minimum and maximum daily temperatures, and the possibility of precipitation. The information is projected 6 days into the future; and represents a location-based service tied to user-provided zip codes. Also presented are the daily-observed values for the prior 3 days. Example presentations are found below:
